Community Notification
powered by

Emergency Communications Network

Register your home and cell phone numbers on our website to receive notifications of power outages, water service interruptions and other utility incidents where timely notification is important. The Police and Fire Departments will also use this system for public safety alerts.

1. From our homepage, www.lelwd.com, click on the Community Notification Enrollment (CNE) link.
2. At the enrollment page, enter all required fields (Name, Address and Phone Numbers).
3. Enter as many numbers (land line and cell) as you wish. This will ensure that all numbers are called in the event of a public notification.

For questions about the program, please call (978) 486-3104.
